

Press Release

Prestige International has acquired International Standard ISMS 'BS 7799-2:2002' compliance certification.

Previous to the implementation of Japan's 'Personal Data Protection Law' in April 2005, Prestige International had put into place a variety of measures to ensure that both client and end user data was secure. To offer further safeguards for clients Prestige International has developed an information security management system throughout the entire company and become compliant with BS7799-2:2002.

BS7799-2:2002 is a standard specification for Information Security Management Systems (ISMS). Such safety measures are the means by which Senior Management monitor and control issues such as security, and is part of Prestige International's internal control systems. Therefore minimizing the residual business risk and ensuring that security continues to fulfill corporate, customer and legal requirements.
